

- MARKO MOGULJAK -

Web Developer | WordPress Development, Design, JavaScript, PHP | I Help Businesses Build Successful Websites, From Small Ventures to Large Enterprises

Miami Beach, Florida 33139 • (786) 867-9152 • marko.moguljak@gmail.com •
linkedin.com/in/markomoguljak

As a skilled web developer with over 10 years of experience, I specialize in designing and developing visually appealing, responsive websites tailored to meet the unique needs of businesses. My expertise spans across front-end and back-end development, custom WordPress solutions, and optimizing user experiences. I excel in managing projects from concept to completion, ensuring cross-browser compatibility, seamless functionality, and ongoing site maintenance.

WORK EXPERIENCE

Optimoroute, Palo Alto, CA • Web Developer

08/2023 - Present

In charge of a small team that is responsible for developing and maintaining the website for a SaaS company, ensuring optimal performance and user experience.

- Managed change requests and implemented updates on the website
- Developed and integrated new features to enhance website functionality
- Optimized website performance for improved efficiency
- Created custom WordPress Gutenberg blocks to tailor content management
- Conducted A/B testing to assess and refine website features
- Refactored legacy code to align with modern standards
- Set up and maintained robust website security protocols
- Developed a custom Zendesk Help Center for streamlined customer support

Served With Honor, Austin, TX • Senior Web Developer

12/2025 - 07/2026

Engineered and optimized high-performance web applications by managing end-to-end development lifecycles, executing complex platform migrations, and integrating modern JavaScript frameworks with backend ecosystems.

- Developed, maintained, and optimized enterprise-level WordPress and Next.js applications, significantly improving page load speeds, SEO performance, and Core Web Vitals.
- Engineered custom API integrations to connect frontend web forms with Salesforce, ensuring seamless, secure, and automated lead routing and data synchronization.
- Designed and built proprietary WordPress plugins to extend platform functionality, eliminate technical debt, and meet business logic requirements.
- Contributed to large-scale website migrations, ensuring 100% data integrity, minimal downtime, and seamless SEO redirection strategies.

- Leveraged AI technologies and APIs to implement smart features and automation within existing web ecosystems, enhancing user experiences and modernizing legacy workflows.
- Audited and refactored legacy codebases and databases, drastically reducing server response times and improving overall application scalability.

First&Third, Redondo Beach, CA, Remote • Front End Wordpress Engineer

09/2025 - 03/2026

Collaborated within a cross-functional agency team to build high-performance, pixel-perfect websites using block-based WordPress development, PHP, and Tailwind CSS.

- Developed custom WordPress themes and reusable layouts using the block editor and block patterns.
- Integrated Tailwind CSS within hybrid and block themes to establish maintainable styles while reducing final asset sizes and improving rendering performance.
- Programmed dynamic block types and advanced layouts using PHP and core WordPress APIs
- Partnered closely with UX/UI designers and back-end engineers to translate Figma designs into semantic, responsive, and fully accessible (WCAG compliant) code templates.
- Contributed to asset delivery and build processes, helping the team consistently achieve high Core Web Vitals scores across client launches.

Endava, Zagreb, CRO, Remote • WordPress Developer

06/2021 - 08/2023

Part of a team that was responsible for planning, developing, testing, deploying, and maintaining WordPress websites:

- I built a multilingual wordPress website for napster.com
- Translating design concepts into visually appealing and functional web elements
- Writing clean, cross-platform, and browser-compatible code
- Deadline-driven, detail-oriented, well-organized, and self-motivated
- Crafting custom WordPress themes tailored to unique client needs
- Expertise in developing custom post types, fields, plugins, and themes for high-traffic WordPress sites
- Converting client requirements into comprehensive application designs and system specifications
- Consistently adhering to application methods and quality standards, ensuring best practices at all stages

DRAP Agency, Zagreb, CRO • Front End Developer

08/2019 - 06/2021

Implemented interactive visual elements based on design specifications, ensuring alignment with user experience requirements, and optimizing web pages for efficiency, cross-browser, and cross-device consistency.

- Translated design mockups into responsive and well-structured HTML, CSS, and JavaScript code
- Ensured cross-browser, cross-platform, and multi-device compatibility for all web solutions, conducting thorough QA on final products
- Coding of custom Wordpress theme and template files using HTML, CSS, PHP, and Bootstrap 4 framework.
- Leveraged JavaScript frameworks to enhance website functionality and interactivity
- Managed the deployment process from local development to staging and production environments using Git

- Provided effective troubleshooting and resolution for web application issues.
- Excelled both independently and collaboratively within team settings
- Enhanced the UX/UI of existing websites, ensuring they were fully responsive
- Developed and maintained front-end functionality to deliver seamless user experiences across websites

Tau on-line d.o.o., Zagreb, CRO • Web Designer

05/2016 - 08/2019

Engaged in a diverse range of projects, designing visually appealing websites and collaborating daily with product owners, back-end developers, and marketing teams.

- Crafted website designs that align with project goals and user needs
- Enhanced UX/UI for existing sites, ensuring they are fully responsive across devices
- Managed the entire website design process, from initial concept through to final delivery
- Designed logos, banners, and newsletters to support branding and marketing efforts
- Developed cross-browser compliant HTML, CSS, and JavaScript for seamless user experiences
- Proposed and executed a new content architecture strategy for an employer branding platform redesign
- Contributed to the development of an online hackathon website, ensuring functionality and user engagement
- Resolved cross-browser compatibility issues to maintain consistent site performance
- Developed and maintained front-end functionality to ensure smooth and efficient website operation

Self employed, Remote • Freelance Web developer / designer

01/2013 - Present

- Collaborate closely with customers to plan and execute web development projects from concept to completion, leveraging a diverse range of tools and technologies.
- Designed complex graphics and professional visual identities for a diverse clientele, including custom logos and branding for businesses, organizations, and individuals
- Delivered tailored web solutions by developing websites and web applications that meet specific business needs
- Managed, maintained, and updated existing websites, offering exceptional customer service
- Provided hosting services, FTP file management, maintenance, and email account setup
- Developed custom WordPress themes and plugins to enhance site functionality
