Professional Summary

Senior Software Engineer with 10+ years of experience building, modernizing, and scaling production web platforms for SaaS startups, enterprise organizations, and digital agencies. Proven track record improving performance, Core Web Vitals, accessibility, SEO, and maintainability while leading platform modernization initiatives. Experienced with PHP, JavaScript, WordPress, Next.js, API integrations, and scalable CMS architecture, partnering with product, marketing, design, and engineering teams to deliver measurable business impact.

Core Competencies

Web Platform Engineering • Platform Modernization • CMS Architecture • Performance Engineering • API Integrations • PHP • JavaScript • Core Web Vitals • Accessibility (WCAG) • SEO • Technical Leadership • Legacy Refactoring • Marketing Engineering • Production Operations

Relevant Experience

Software Engineer, Web Platform (Remote)

Optimoroute, Palo Alto, CA (Startup) | Aug 2023 – Present

Own the engineering and continuous evolution of Optimoroute's public web platform, partnering with marketing, product, and design teams to deliver scalable CMS capabilities, improve performance, and support customer acquisition for a fast-growing SaaS startup. Lead platform modernization initiatives focused on performance, reliability, maintainability, and editor experience while ensuring a stable, secure, and high-performing production environment.

- Provided technical leadership for the web platform, reviewed pull requests, and coordinated feature delivery with product, marketing, and design stakeholders.
- Lead a team of 2 engineers responsible for a production web platform supporting 500+ pages.
- Engineered 30+ reusable Gutenberg blocks and scalable content components.
- Reduced page load times by ~30%; increased Google Lighthouse Performance from 75 to 90.
- Improved SEO from 59 to 92, Accessibility from 45 to 81, and increased conversion by ~5%.
- Resolved Core Web Vitals issues including CLS, implemented caching strategies, and maintained 99.99% uptime.
- Built custom WordPress functionality, API integrations, and Zendesk enhancements supporting marketing and customer success.

Tech: JavaScript • PHP • WordPress • Gutenberg • Timber • React • Node.js • REST APIs • Zendesk • CI/CD • AI-assisted Development

Senior Software Engineer (Remote)

Served With Honor, Austin, TX (Startup) | Dec 2025 – Jul 2026

Joined a growing startup to modernize and scale its digital platform, leading engineering initiatives focused on performance, maintainability, and long-term platform health. Worked alongside cross-functional teams to improve user experience, content management, and deliver reliable, scalable solutions supporting the company's mission and continued growth.

- Modernized enterprise WordPress and Next.js applications supporting 300+ pages.
- Reduced page load times by ~40% and increased Lighthouse Performance from 65 to 90.
- Reduced plugins from 52 to 23 through custom platform solutions.

- Built Salesforce API integrations and custom WordPress extensions.
- Contributed to migrations preserving SEO and production stability.
- Integrated AI-powered services and refactored legacy codebases.

Tech: JavaScript • PHP • Next.js • WordPress • Docker • Git • Node.js • Zendesk • Salesforce API • AI-assisted Development

Front-End Software Engineer (Remote)

First&Third, Redondo Beach, CA, (agency) | Dec 2025 – Jul 2026

Supported cross-functional engineering teams to build scalable, high-performance web platforms for enterprise clients, focusing on modern frontend architecture, reusable CMS capabilities, accessibility, and performance optimization.

- Engineered reusable Gutenberg blocks, block patterns, and modular WordPress themes that improved content publishing efficiency and long-term maintainability.
- Integrated Tailwind CSS into modern WordPress architectures, reducing CSS complexity while improving rendering performance and maintainability.
- Developed dynamic block functionality using PHP, JavaScript, and WordPress APIs while following modern engineering practices.
- Collaborated with UX designers, backend engineers, and project managers to deliver accessible, responsive, production-ready user experiences.
- Optimized frontend assets and rendering strategies, consistently contributing to excellent Core Web Vitals across client launches.

Tech: Javascript • PHP • HTML5 • CSS3 • Git • WordPress VIP • Gutenberg • Tailwind • AI-assisted Development

Software Engineer (Remote)

Endava , Zagreb, CRO, (agency) | Jun 2021 – Aug 2023

Worked within distributed engineering teams delivering enterprise-scale web platforms, modernizing legacy systems, and building scalable CMS solutions for globally recognized brands.

- Built and maintained multilingual enterprise web platforms, including Napster, supporting high-traffic production environments.
- Designed scalable WordPress architectures using custom plugins, Gutenberg, custom post types, reusable content models, and modern development practices.
- Refactored legacy codebases to improve scalability, and long-term platform health.
- Contributed throughout the software development lifecycle, including technical planning, implementation, testing, deployment, and production support.

Tech: Javascript • PHP • HTML5 • CSS3 • Git • WordPress • Gutenberg • Git • Javascript • Figma • Agile

Front-End Software Engineer (Remote)

DRAP Agency , Zagreb, CRO, (agency) | Jun 2021 – Aug 2023

Developed modern web experiences for agency clients, translating design systems into accessible, responsive production applications while improving frontend quality and maintainability.

- Built responsive web applications using HTML, CSS, JavaScript, PHP, and WordPress for a variety of commercial clients.
- Improved performance, accessibility, and cross-browser compatibility across existing websites.
- Managed Git-based deployment workflows from local development through staging and production.
- Enhanced existing web platforms through frontend modernization, usability improvements, and technical problem solving.

Tech: Javascript • PHP • HTML5 • CSS3 • Git • WordPress • Gutenberg • ACF • Figma • Jira

Web Developer / UI Engineer

Alma Media , Zagreb, CRO | Jun 2021 – Aug 2023

Designed and delivered end-to-end digital experiences for commercial clients, combining software engineering, UX implementation, and technical consulting from project discovery through deployment.

- Delivered complete website projects from planning and architecture through production deployment and long-term maintenance.
- Built responsive frontend systems emphasizing usability, accessibility, and consistent cross-browser behavior.
- Worked directly with stakeholders to translate business objectives into scalable technical solutions.
- Improved information architecture and content organization to enhance user engagement and content management.
- Supported product launches by delivering frontend development, branding assets, and technical implementation.

Tech: HTML5 • CSS3 Javascript • jQuery • WordPress • Adobe Photoshop • Illustrator • XD • inDesign

Independent Software Consultant

Freelance | Jun 2021 – Aug 2023

Partnered directly with businesses to design, build, modernize, and maintain production web platforms, serving as technical lead throughout the entire software development lifecycle.

- Delivered custom software solutions for startups, agencies, and small businesses across industries.
- Led projects from discovery, solution architecture, implementation, deployment, and long-term support.
- Designed scalable CMS architectures, custom plugins, and specific workflows tailored to client requirements.
- Modernized legacy websites through performance optimization, code refactoring, and technical debt reduction.
- Combined engineering, product thinking, UX implementation, and branding expertise to help businesses strengthen their digital presence.

Tech: HTML5 • CSS3 • JavaScript • PHP • WordPress • React • Figma • Web Hosting • cPanel

Technical Skills

Languages:

PHP • JavaScript • TypeScript • HTML • CSS • SQL

Frameworks & Platforms :

WordPress • Gutenberg • React.js • Next.js • Node.js • Tailwind • Bootstrap

Platform:

REST APIs • CMS Architecture • Core Web Vitals • Accessibility • SEO

Engineering:

Git • CI/CD • QA • Performance Optimization • Legacy Modernization

Education

M.Sc., Information & Communication Sciences - University of Zagreb

B.Sc., Information Sciences - University of Zagreb
