Professional Summary

I'm a Senior Software Engineer with 10+ years of experience building and improving production web platforms. I like solving problems, finding ways to make existing systems better, and sometimes taking on independent projects that let me explore new technologies and architectures. My work has ranged from AI-powered automation and personalization to serverless AWS platforms, with a strong background in PHP, JavaScript, WordPress, Next.js, APIs, and scalable CMS solutions. I care about building software that is fast, maintainable, and genuinely useful to the people and businesses using it.

Core Competencies

Web Platform Engineering • Platform Modernization • CMS Architecture • Performance Engineering • API Integrations • PHP • JavaScript • Core Web Vitals • Accessibility (WCAG) • SEO • Technical Leadership • Legacy Refactoring • Marketing Engineering • Production Operations

Relevant Experience

Senior Software Engineer / Consultant , Web Platform (Remote)

Optimoroute, Palo Alto, CA (Startup) | Aug 2023 – Present

Led technical development of Optimoroute's web platform, building AI-powered automation, personalization, custom CMS solutions, and integrations while driving performance and platform improvements.

- **Provided technical leadership for a team of 2 engineers**, driving architectural decisions, reviewing implementations, and coordinating feature delivery from development through production.
- **Built an AI-powered Zendesk translation automation system** that uses the Zendesk API and OpenAI to translate new and updated articles into **five languages**, including associated images, with a scheduled GitHub workflow that automatically detects content requiring translation or retranslation.
- **Developed an AI-powered content personalization system** that analyzes page content and uses AI to evaluate the relevance of configurable selectors, combining those signals with visitor behavior to score users and dynamically serve personalized content.
- **Built a custom multilingual Zendesk Help Center** with custom templates, content tagging, role-based content visibility, forms, lightboxes, and dynamic table of contents, extending Zendesk beyond its standard capabilities.
- **Developed an OpenAI integration for TranslatePress** that extends the plugin with AI-powered page translation capabilities not available in the standard plugin, streamlining multilingual content creation.
- **Built interactive ROI and CO₂ calculators** that allow prospective customers to quantify the financial savings and environmental impact of using the platform, supporting the sales and marketing process.
- **Improved overall platform performance and accessibility**, reducing page load times by ~30%, increasing Lighthouse Performance from 75 to 90, SEO from 59 to 92, and Accessibility from 45 to 81, while maintaining 99.99% uptime.

Tech: JavaScript • PHP • WordPress • Gutenberg • Timber • React • Node.js • REST APIs • Zendesk • CI/CD • AI Integration & Product Development

Software Engineer (Remote)

Endava , Zagreb, CRO, (agency) | Jun 2021 – Aug 2023

Worked within distributed engineering teams delivering enterprise-scale web platforms, modernizing legacy systems, and building scalable CMS solutions for globally recognized brands.

- Developed the majority of Napster.com's new WordPress pages and templates using PHP, WordPress, and ACF as part of a full website rebuild.
- Identified a developer bottleneck in the landing-page workflow and designed a flexible ACF-based page builder that enabled marketing teams to independently create and launch pages, significantly reducing turnaround time and ongoing engineering effort.
- Modernized enterprise WordPress and Next.js applications while supporting platform migrations that preserved SEO performance, production stability, and critical functionality.

Tech: Javascript • PHP • HTML5 • CSS3 • Git • WordPress • Gutenberg • Git • Javascript • Figma • Agile

Independent Projects & Consulting

Since 2013

I sometimes take on independent projects to explore emerging technologies, experiment with modern architectures, and apply new approaches to real-world engineering problems.

- Worked directly with business owners to turn ideas into complete digital experiences from branding and visual identity to website architecture, development, and ongoing optimization helping their businesses grow through a stronger online presence.
- **AWS Serverless Web Architecture:** Explored a modern serverless architecture using S3, CloudFront, Route 53, Lambda, SES, and Terraform to build a secure, globally distributed hosting platform with infrastructure defined as code.
- **Open-Source Cloud-Native CMS — In Development:** Building an open-source CMS based on the serverless AWS architecture explored in the proof of concept, focusing on scalable infrastructure, modern content management, and developer experience.

Tech: HTML5 • CSS3 • JavaScript • PHP • WordPress • React • Next.js • Figma • Web Hosting • cPanel • Cloud • AWS • serverless • infrastructure as code • distributed systems

Other Experience

Served With Honor - Senior Software Engineer | Dec 2025 – Jul 2026

First&Third — Software Engineer, Contract Sep | 2025 – Nov 2025 - 3-month project

DRAP Agency - Front-End Software Engineer | Aug 2019 – Jun 2021

Alma Media Web - Developer / UI Engineer | May 2016 – Aug 2019

Technical Skills

Languages: PHP • JavaScript • TypeScript • HTML • CSS • SQL

Frameworks & Platforms : WordPress • Gutenberg • React.js • Next.js • Node.js • Tailwind • Bootstrap

Platform: REST APIs • CMS Architecture • Core Web Vitals • Accessibility • SEO

Engineering: Git • CI/CD • QA • Performance Optimization • Legacy Modernization

Education

M.Sc., Information & Communication Sciences - University of Zagreb

B.Sc., Information Sciences - University of Zagreb
