

- MARKO MOGULJAK -

**Software Engineer | Web Platform Engineering, WordPress, PHP, JavaScript, APIs,
Performance Optimization**

Miami Beach, Florida 33139 • (786) 867-9152 • marko.moguljak@gmail.com •
linkedin.com/in/markomoguljak

Software Engineer with 10+ years of experience building and optimizing production web platforms, custom WordPress systems, frontend applications, and API integrations. Skilled in PHP, JavaScript, performance optimization, Core Web Vitals, accessibility, SEO, legacy code refactoring, custom plugins, Gutenberg blocks, and scalable content systems for business-critical websites.

WORK EXPERIENCE

Optimoroute, Palo Alto, CA • Software Engineer, Web Platform

08/2023 - Present

Lead development and maintenance of the production website for a SaaS company, owning implementation, performance, reliability, content systems, and user experience across the web platform.

- Lead a small web team responsible for developing, maintaining, and optimizing the company website.
- Build and maintain custom WordPress functionality to support marketing, product, and customer acquisition initiatives.
- Engineer reusable Gutenberg blocks and content components to improve scalability and editor flexibility.
- Develop and integrate new website features using PHP, Timber, JavaScript, WordPress APIs, and frontend technologies.
- Refactor legacy code to improve maintainability, performance, reliability, and modern development standards.
- Optimize website performance, Core Web Vitals, and frontend efficiency across pages and templates.
- Implement and maintain website security protocols, plugin updates, and production stability processes.
- Conduct A/B testing and data-informed experiments to improve user experience and conversion paths.
- Develop and customize Zendesk Help Center experiences to improve customer support workflows and documentation access.
- Manage change requests, production updates, QA, and deployment coordination across stakeholders.

Served With Honor, Austin, TX • Senior Software Engineer, Web Platforms

12/2025 - 07/2026

Engineered and optimized high-performance web applications by managing end-to-end development lifecycles, executing complex platform migrations, and integrating modern JavaScript frameworks with backend ecosystems.

- Developed, maintained, and optimized enterprise-level WordPress and Next.js applications, significantly improving page load speeds, SEO performance, and Core Web Vitals.
- Engineered custom API integrations to connect frontend web forms with Salesforce, ensuring seamless, secure, and automated lead routing and data synchronization.
- Designed and built proprietary WordPress plugins to extend platform functionality, eliminate technical debt, and meet business logic requirements.
- Contributed to large-scale website migrations with a focus on data integrity, uptime, SEO preservation, and redirect strategy.
- Integrated AI technologies and APIs to modernize workflows, automate processes, and enhance user-facing functionality.
- Audited and refactored legacy codebases and databases to improve scalability, reduce server response times, and increase maintainability

First&Third, Redondo Beach, CA, Remote • Front End Wordpress Engineer

09/2025 - 03/2026

Collaborated with a cross-functional agency team to build performant, accessible, and maintainable websites using block-based WordPress development, PHP, Tailwind CSS, and modern frontend workflows.

- Developed custom WordPress themes, reusable layouts, block patterns, and editor-friendly content systems.
- Integrated Tailwind CSS into hybrid and block themes to create maintainable styles, reduce asset size, and improve rendering performance.
- Programmed dynamic block types and advanced layouts using PHP, core WordPress APIs, and modern frontend practices.
- Partnered with UX/UI designers and backend engineers to translate Figma designs into semantic, responsive, accessible code.
- Contributed to asset delivery and build processes, helping the team consistently achieve high Core Web Vitals scores across client launches.
- Implemented responsive templates and reusable components with a focus on accessibility, maintainability, and production quality.

Endava, Zagreb, CRO, Remote • Software Engineer, WordPress / PHP

06/2021 - 08/2023

Worked as part of a distributed engineering team responsible for planning, developing, testing, deploying, and maintaining WordPress-based web platforms for enterprise clients.

- Built and maintained multilingual WordPress websites, including napster.com.
- Translated product and design requirements into scalable application structures, templates, components, and content models.
- Developed custom WordPress themes, plugins, custom post types, and custom fields for high-traffic websites.
- Wrote clean, cross-platform, browser-compatible PHP, HTML, CSS, and JavaScript.
- Converted client requirements into technical specifications, implementation plans, and production-ready solutions.

- Expertise in developing custom post types, fields, plugins, and themes for high-traffic WordPress sites
- Followed development standards, QA processes, and best practices throughout planning, implementation, testing, and deployment.
- Collaborated with project managers, designers, QA teams, and backend engineers to deliver stable and maintainable web applications.

DRAP Agency, Zagreb, CRO • Front-End Software Engineer

08/2019 - 06/2021

Implemented interactive, responsive, and production-ready frontend experiences based on design specifications, user experience requirements, and performance goals.

- Translated design mockups into responsive, semantic HTML, CSS, JavaScript, PHP, and WordPress templates.
- Developed custom WordPress themes and template files using PHP, Bootstrap, JavaScript, HTML, and CSS.
- Ensured cross-browser, cross-platform, and multi-device compatibility through testing and QA.
- Enhanced website functionality and interactivity using JavaScript and frontend frameworks.
- Managed deployment workflows from local development to staging and production environments using Git.
- Troubleshooting and resolving frontend and web application issues across production websites.
- Improved UX/UI implementation and responsive behavior for existing websites and digital products.
- Collaborated with designers, developers, and project stakeholders to deliver reliable web experiences.

Tau on-line d.o.o., Zagreb, CRO • Web Developer / UI Engineer

05/2016 - 08/2019

Designed and developed responsive web experiences while collaborating with product owners, backend developers, and marketing teams on a variety of digital projects.

- Developed cross-browser compliant HTML, CSS, and JavaScript for responsive web interfaces.
- Improved UX/UI for existing websites, ensuring consistent usability across devices and browsers.
- Managed website design and implementation processes from concept through final delivery.
- Proposed and executed a new content architecture strategy for an employer branding platform redesign.
- Contributed to the development of an online hackathon website, supporting functionality, content structure, and user engagement.
- Resolved cross-browser compatibility issues and maintained consistent website performance.
- Created supporting visual assets, including logos, banners, newsletters, and brand materials when needed.

Self employed, Remote • Freelance Software Engineer / Web Developer

01/2013 - Present

Partner with clients to plan, build, maintain, and improve custom websites, WordPress platforms, plugins, and business-focused web solutions.

- Deliver custom web solutions by developing websites, WordPress themes, plugins, and frontend functionality tailored to client needs.

- Manage projects from discovery and planning through development, deployment, maintenance, and ongoing support.
- Build and maintain custom WordPress themes and plugins to support client-specific workflows and content requirements.
- Provide technical support, hosting coordination, FTP/file management, maintenance, and email account setup.
- Maintain and update existing websites, troubleshoot technical issues, and provide long-term client support.
- Create visual identities, logos, and supporting brand assets for clients when projects require design support.

EDUCATION

Master's degree, Computer Science • Faculty of humanities and social sciences Department of Information and Communication Sciences, University of Zagreb
Graduation Year (2012)

Bachelor's, Information sciences degree, Computer Science • Faculty of humanities and social sciences Department of Information and Communication Sciences, University of Zagreb
Graduation Year (2010)

TECHNICAL SKILLS

Languages

JavaScript, PHP, HTML5, CSS3, SQL, Sass

Frameworks, Libraries & Platforms

WordPress, Gutenberg, Next.js, Node.js, jQuery, Bootstrap, Tailwind CSS

WordPress Engineering

Custom themes, custom plugins, Gutenberg blocks, block patterns, custom post types, custom fields, WordPress APIs, multilingual websites, performance optimization, CMS architecture

Frontend Engineering

Responsive design, accessibility, semantic HTML, cross-browser compatibility, Core Web Vitals, frontend performance, UI implementation, design systems

Backend & Integrations

PHP development, API integrations, Salesforce integrations, form automation, data synchronization, server-side troubleshooting

Engineering Practices

Git, debugging, QA, deployment workflows, legacy code refactoring, technical planning, production maintenance, security protocols, performance auditing

Tools

NPM, Figma, Adobe Photoshop, Adobe Illustrator
